

EXP.NO: 2	Zoho Creator Setup and Platform Exploration
------------------	--

Aim:

To create a Zoho Creator account, explore its interface, and understand the basic features required to develop a **Student Admission Enquiry Management System**.

Procedure:

1. Opened the Zoho Creator website and signed in.
2. Created a new Blank Application.
3. Named the application **Student Admission Enquiry Management**.
4. Opened the application dashboard.
5. Created a new form named **Admission Enquiry Form**.
6. Added fields required to collect student admission details such as **Student Name, Date of Birth, Gender, Email Address, Contact Number, Residential Address, Guardian Name, Class XII Percentage, Preferred Course, Areas of Interest, Preferred Counselling Time, and Additional Remarks**.
7. Explored the **Dashboard, Forms, Reports, Pages, Workflows, and Settings** sections.
8. Saved the application and verified that the **Admission Enquiry Form** was created successfully.

Observation:

- Zoho Creator account was created successfully.
- A **Student Admission Enquiry Management** application was created.
- The **Admission Enquiry Form** was designed using drag-and-drop fields.
- The platform interface and basic development tools were explored successfully.

Conclusion:

The experiment helped in understanding the Zoho Creator interface and creating a basic **Student Admission Enquiry Management System**. The platform made it easy to design and develop an admission enquiry form using drag-and-drop components with minimal coding.
